RE: Durham York Energy Centre – Termination of Emergency Storage of Waste

Dear Ms. Dugas:

As a follow-up to my letter dated March 2, 2016 re: Durham York Energy Centre – Plant Maintenance Outages and Odour Mitigation, and as per Condition (8)(b)(i)(D) of the Environmental Compliance Approval 7306-8FDKNX, Notice 5 dated March 14, 2016, “*The Owner shall notify, in writing, the District Manager when emergency storage is no longer required*”, I can confirm that on April 8, 2016 the Durham York Energy Centre returned to compliance with Condition (8)(a), “*Waste received at the Site shall be processed within six (6) days from its receipt at site*”.

During this time, Covanta’s Standard Operating Procedure for monitoring and mitigation of odours, which includes active odour suppression within the tip floor as well as perimeter odour surveys was implemented. These measures were successful, resulting in no reported public odour complaints during this period of planned Facility maintenance.

Sincerely,

Matt Neild
Facility Manager
